The Department reserves the right in cases of violation of permit specified ground water limits or Ground Water Quality Standards (N.J.A.C. 7:9-6.1 et seq.) to require that wells be resurveyed to an accuracy of one-hundredth of a second latitude and longitude. This shall not be considered to require a major modification of the NJPDES permit.

**ALL EXISTING AND PROPOSED MONITORING WELLS SHALL MEET THE
FOLLOWING REQUIREMENTS**

A Ground Water Monitoring Well Certification Form (A and B) must be completed for each existing and proposed ground water monitoring well. Information for each well must be shown on a separate well completion form. The form entitled, "Ground Water Monitoring Well Certification, Form A- As Built Construction Certification", must be signed by one of the following: a New Jersey licensed Professional Engineer; a licensed New Jersey Well Driller; a Geologist certified by any State; a Geologist certified by the American Institute of Professional Geologists; an individual certified by the American Institute of Hydrology; any other person approved by the Department. Form B, "Location Certification", must be signed and sealed by a licensed New Jersey land Surveyor. For an existing well, if the information required on the well completion form cannot be determined or if the well is not adequately constructed to meet the requirements of the NJPDES Permit, the Department reserves the right to require additional replacement well(s) to be drilled. Criteria to be used by the Department in judging the adequacy will be related to the ability of the well to provide a representative ground water sample at any time of the year as specified within the NJDPES Permit. Any replacement well must be installed within a ten (10) foot radius of the specified sample location. Inadequate or damaged wells must be properly sealed as per N.J.A.C. 58:4A-4.1. Instructions regarding sealing may be obtained by contacting the Water Allocation office at (609) 292-2957.
